

# TR-FEED DRESSER

# TR-FEED DRESSER

## GENERAL DESCRIPTION

Our **FEED DRESSERS** are designed to separate unwanted lumps from mash feed. The raw mash feed is conveyed by a screw feeder towards the screening area where four neoprene wiper blades force the particles of the right size through the screens. The cleaned product is then discharged by the bottom of the unit. The foreign and oversized particles retained by the screens are rejected through an outlet located at the opposite end.

MODELS	HP	OVERALL DIMENSIONS (in)	MAX CAPACITY TPH
TR-60	15	30 x 121 x 39	60
TR-100	25	30 x 148 x 39	100
